'Hillside' Description & Particulars

The Hillside has provided outstanding services in marine accommodation since its refurbishment in 2004, to multiple clients. These include providing crew accommodation for BVT LTD in a ship regeneration project from 2004 to 2008, and construction crew accommodation for IREM S.P.A from 2008 to 2009. It provides comfortable rooms and caters to all the essential needs of over 200 individuals, in addition to a long running history of excellent hygiene and safety standards.

The barge is currently configured with 69 rooms, each of about 15 square metres. Rooms have the flexibility to be used as either office or bedroom space. In May 2009 she was recorded to have 230 persons onboard, all fully utilising the services available.

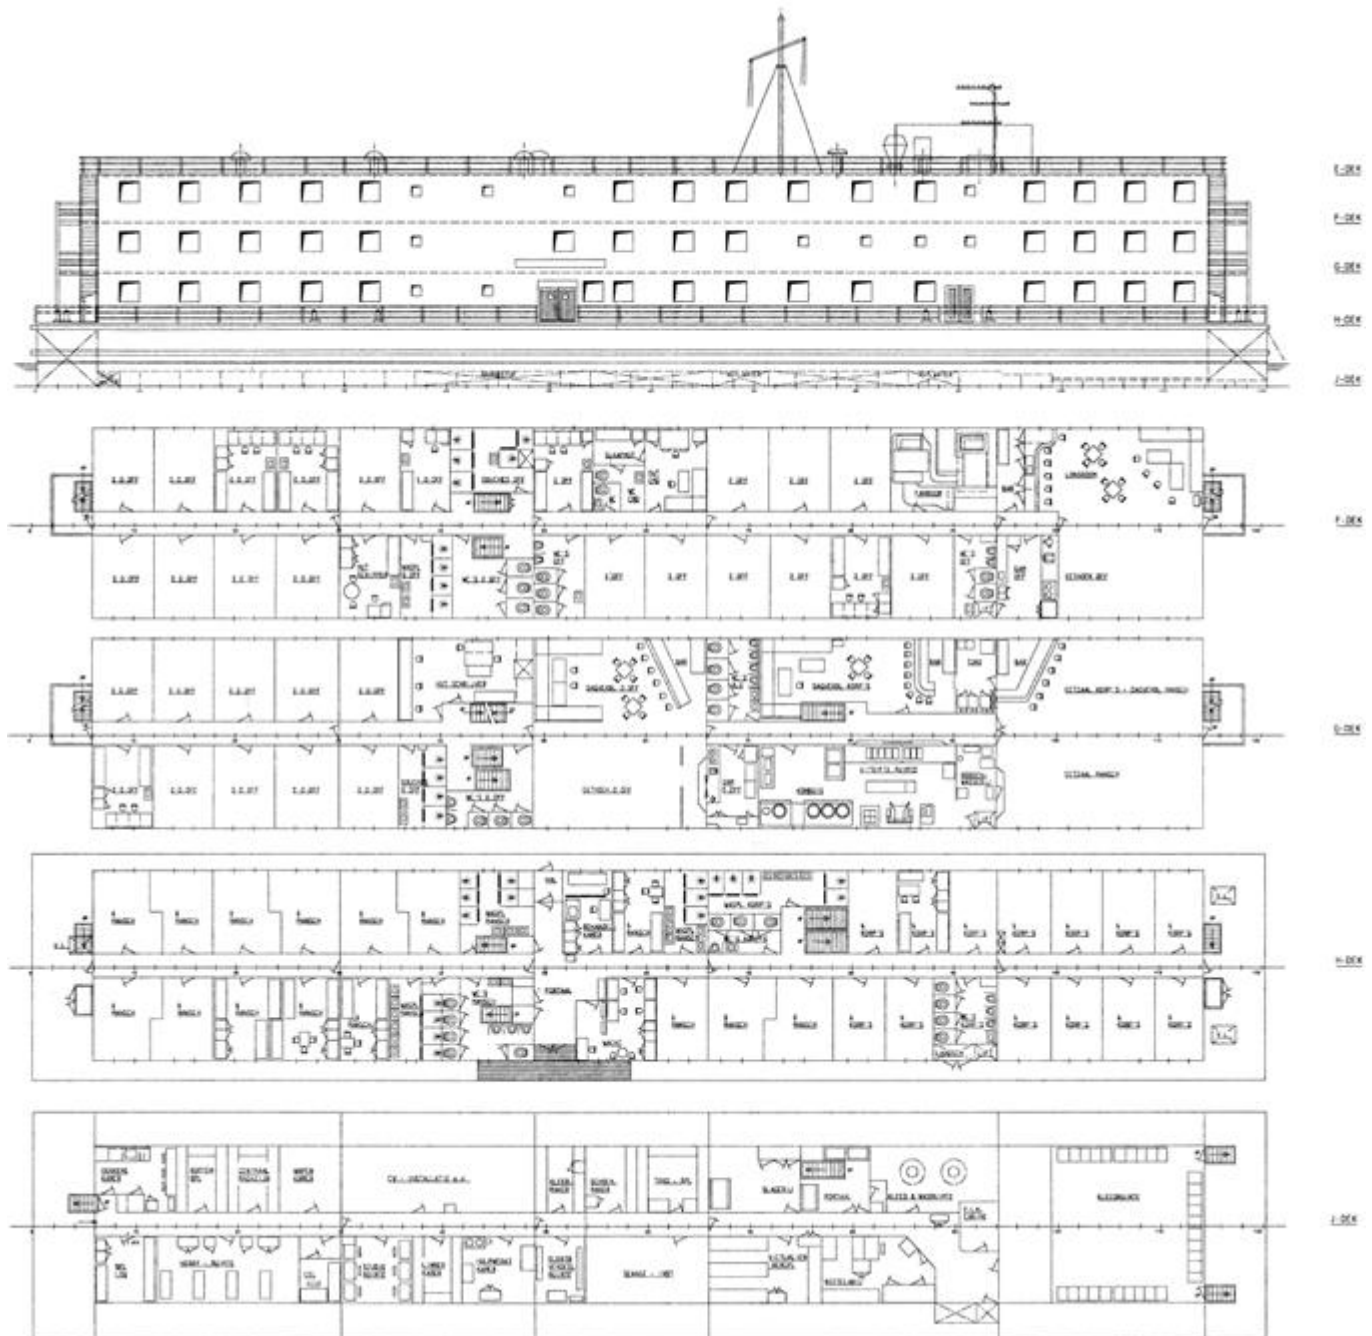

Rooms are spacious and well equipped with wash basins and ample plug sockets provided for the rooms on the two upper decks. Communal WCs and showers are located throughout the vessel. A fully equipped galley is positioned on the second floor, serving two mess rooms & lounges. Further TV and recreation facilities can be found at a small bar on the same floor, or in the mess & lounge room on the third floor.

The barge deck of the Hillside houses a large meeting room and cinema capable of seating 70-80 people. A number of large store rooms and a laundry can also be made available for customer use on request.
